

COMPACT SOLID STATE ELECTRONIC TRANSFORMERS

Fuse Protected Electronic Transformer

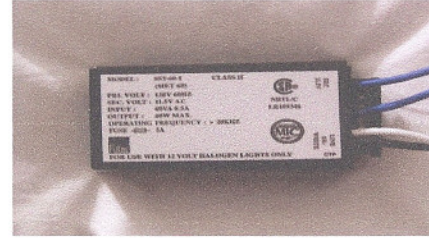

MODEL: MET - 60

Class 2

Input : 120V / Output : 11.5V 60Hz

Load : 60Watts max. / 10Watts min.

Size : 2.75"(70mm)x1.44"(36mm)x1.13"(29mm)

Thermal Cut Off Protected Transformer

MODEL: MET-75-1

Class 2

Input : 120V / Output : 11.5V 60Hz

Load : 80Watts max. / 10 Watts min.

Size : 3.56"(90mm)x1.25"(32mm)x.97"(25mm)

Thermal Cut Off Protected Transformer

MODEL: ET-150-12-1

Class 2

Input : 120V / Output : 11.5V 60Hz

Load : 150Watts max. / 10Watts min.

Size : 4.03"(103mm)x1.41"(36mm)x1.06"(27mm)

THE MET SERIES FROM MARCUS...a revelation in low voltage lighting technology.

The MET series provides control of low voltage sources with a standard 120 volts dimmer or switch. Compatible with most incandescent and electronic type dimmers, units have complete zero to full power gradient capacity. Significant size/weight reductions open up new design and flexibility.

SAVES ENERGY and lowers operating costs on multi-fixture applications.

Complete sealed units-rugged flame retardant plastic casing. Ambient temperature up to 60 degrees Celsius.

Power multiple lamps, track lighting, recessed lighting and indoor/outdoor fixtures.

CSA certified and NRTL/C approved.

Comes with secondary fusing for overload protection for model (MET 60) only. Other models are thermal cut off.

.High power factor and low harmonic distortion.

One year ltd. Warranty.

All above models for use with halogen lamps only.
